“VisitAbility expands the American dream of homeownership to a new dimension. The program reflects our commitment to make this dream possible for our buyers of any age or ability. We think it is an excellent opportunity for all builders to study the basic components of VisitAble homes and incorporate them into their designs. Enhancing homeowners’ lifestyle is why we constantly strive to build better homes, such as VisitAble models.”

William R. Grove

Salutes

ROGER B. ZIMMER & WILLIAM R. GROVE,
partners, Zimmer Grove Homes, Inc.

As young boys Roger Zimmer and Bill Grove experienced what it takes to build a home and run a successful business. They learned the trade from their fathers and followed in their footsteps. They are proud to say that Zimmer Grove Homes has a 90-year-old foundation of industry knowledge. To ensure company growth and profitability, Zimmer earned a business management degree from Elizabethtown College and Grove graduated from Penn State University with a civil engineering degree. The business has thrived through their leadership and dedication to quality.

Zimmer and Grove truly enjoy the building industry.

Their fine homes are testament to their pride of workmanship and design integrity. The VisitAble home showcased at Stoneybrook is one more example of these builders’ forward thinking. The two-story model features a luxurious first floor owners’ wing, an open floorplan, highly appointed kitchen and many other amenities, including an attractive fireplace.
