NOTES:

1. Top of the porch slab must be within $\pm 1/2"$ of finished floor grade.
2. Porch slab must be sloped at least 1:32 away from front of house to insure proper drainage.
3. Although not required, a covered porch is highly recommended in order to increase safety and functionality of the entrance.
4. Proper soil compaction is imperative to reducing settlement of porch and adjoining sidewalks. Approved compaction methods should be used.
